

I URGE ALL LEADERS TO ATTEND THIS SEMINAR!

On February 12, 2011 I attended a seminar run by Evangelism Strategies International led by Julian Batchelor called 'How to create a church with a DNA of evangelism'. This inaugural one day seminar was one of the best I have attended as a Pastor with 25 years of experience.

The presentation of the material was of the highest standard and easy to follow.

The content was, to be frank, amazing.

It not only informed but gave a fresh biblical understanding of the role evangelism should play in each of our lives. It also gave tremendous clarity as to the true biblical mission of the Church.

To be blunt the church (from my point of view) has largely left evangelism to the 'evangelists.' From My understanding of Ephesians 4:11-12 evangelists are to equip the people of God for the work. To this end this seminar realigns people to their role and responsibility before God, and gives clear and easily to follow steps to get there.

On a personal level it has changed my thinking on evangelism and shown me that a lot of what we think is evangelism is not. Attending this seminar has encouraged and empowered me as a leader. It has shown me clearly what changes I need to make to create a church with a DNA of evangelism and fulfill the Great Commission of Jesus Christ.

I believe with all my heart that every church and believer (not just leaders) needs attend this seminar.

Pastor David Lewis

Jireh House, Central Hawkes Bay Christian Fellowship.
